FOR IMMEDIATE RELEASE

## **BRANDON WEISS AWARDED LEED AP DESIGNATION**

*SOUTH ELGIN, IL, June 30, 2009* -- Brandon Weiss, President of Weiss Building & Development LLC, has attained LEED AP accreditation. LEED AP accreditation is awarded through the U.S. Green Building Council; the USGBC is the national consensus for producing a new generation of buildings that deliver high performance inside and out. The USGBC is dedicated to expanding green building practices and education, and its LEED (Leadership in Energy and Environmental Design) Green Building Rating System.

The LEED Rating System supports global adoption of sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria. A LEED AP is an individual who has demonstrated the knowledge and skills necessary to participate in the design process, support & encourage integrated design and streamline the LEED application and certification process.

LEED AP accreditation strengthens Weiss Building & Development's qualifications when responding to clients requiring a LEED AP and provides additional resources for green building as it relates to Weiss Building & Developments solutions when preparing to participate in a LEED project.

Earning our second green building designation, Weiss Building & Development LLC has one of the most green educated and certified companies out there.
